

System Requirements *

Client Technical Requirements

	Enterprise Application User	Model Designer
Browser	Microsoft Internet Explorer 10.0, or later	Microsoft Internet Explore 10.0, or later
Operating System	Microsoft Windows XP Professional SP2, or later	Microsoft Windows XP Professional SP2, or later
Processor	Pentium III 500 MHz	Pentium III 500 MHz
Memory	2 GB	4 GB

Supported Office Versions	Required Components
Office 2000 Office XP Office 2003 Office 365 (Desktop) Office 2007 Office 2010 Office 2013	Silverlight 5.0

Server Technical Requirements

	Production /Development Environment
Operating System	Windows Server 2008 R2 Standard or Enterprise Edition, or later x64 Architecture
Web Server	Microsoft IIS 7.0
SQL Server (Relational)	<u>Version</u> : Microsoft SQL Server 2008 R2, or later (2012, 2014, 2016) <u>Edition</u> : Enterprise, BI, Standard **
SSAS Server (Multi-Dimensional)	<u>Version</u> : Microsoft SQL Server Analysis Services 2008 R2, or later (2012, 2014, 2016) <u>Edition</u> : Enterprise, BI, Standard **

Kepion Server Sizing Guide ***

	Web Server	SQL Server (Relational)	SSAS Server (Multi-Dimensional)
Small < 10 users Limited Volumes of data	2 processor cores at 2.4Ghz, or better 2 GB RAM	2 processor cores at 2.4Ghz, or better 3+ GB RAM	2 processor cores at 2.4Ghz, or better 3+ GB RAM
Medium < 50 users Moderate Volumes of data	2-2 processor cores at 2.4Ghz, or better 4 GB RAM	2-8 processor cores at 2.4Ghz, or better 6+ GB RAM	2-8 processor cores at 2.4Ghz, or better 6+ GB RAM
Large > 50 users Large Volumes of data	8+ processor cores at 2.4Ghz, or better 6+ GB RAM	8+ processor cores at 2.4Ghz, or better 8+ GB RAM	8+ processor cores at 2.4Ghz, or better 8+ GB RAM

* This is a high level guide and does not represent the actual configuration in every case. Please refer to the [Kepion Setup Guide](#) for more details.

** Learn more about the [Kepion SQL Standard Support](#).

*** The sizing guide is applicable to both single-tier installation and multi-tier installation, i.e. Web Server, SQL Server and SSAS Server can be installed on a single machine, or multiple machines.
